JUNYLOU DANIEL

PROFESSIONAL SUMMARY

Highly versatile and self-motivated **Retail Systems Analyst & IT Specialist** with extensive experience driving multi-site store implementations, POS systems engineering, and secure payment deployments. Combines a solid technical foundation in cross-platform operating systems and enterprise networking with strong project coordination capabilities. Proven track record managing full-lifecycle technology rollouts—from managing vendor to configuring POS controllers and integrating global payment networks. A dedicated troubleshooter adept at delivering 3rd-level service management and after-hours support to ensure mission-critical store stability and minimize operational downtime.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Retail Store Deployments:** New store implementations, store renovations, hardware staging/rollouts, site acceptance testing, gatekeeping activities, and vendor management.
- **POS & Back-Office Infrastructure:** POS controllers/terminals, back-office servers, workstations, network access points, RF guns, receipt printers.
- **Retail Payment Operations:** Global Payments merchant setups, payment gateway routing, EMV PIN pad installations, and transaction troubleshooting, SQL queries and reporting.
- **Network & Infrastructure:** Router and modem installation, enterprise internetworking (TCP/IP) configuration and troubleshooting, Cat 5/Cat 6 structured cabling oversight.
- **Systems & OS Adaptability:** Heterogeneous operating systems administration (Windows, 4690, CentOS), hardware-software integration, and custom scripting logic.
- **Service Management & Ops:** 3rd-level technical escalations, high-stakes troubleshooting, technical documentation and training, and cross-functional team collaboration.

PROFESSIONAL EXPERIENCE

A. ONTARIO CANNABIS STORE, Toronto, Canada | 2024 - 2025

IT Service Management Analyst - Infrastructure and Operations

- Implemented ITIL-based incident, problem, and change management processes, improving consistency of service delivery.
- Developed and maintained ServiceNow service catalogue items aligned to business needs.
- Created user documentation and guides for ServiceNow and Microsoft 365 applications.
- Resolved IT service issues by coordinating cross-functional teams, documenting actions taken and resolution steps, and implementing solutions that improved response times and service reliability.

- Provided hardware specification assessments to support strategic decisions for next-generation IT hardware inventory.
- Oversaw hardware inventory management and led user hardware audit activities.
- Reduced monthly operational costs by thousands of dollars through proactive audits of phone lines and software licenses, eliminating unused subscriptions.

B. HUDSON'S BAY COMPANY, Toronto, Canada | 2002 – 2023

Payment Technology Analyst - SAKS Off 5th e-commerce Team, 2022 - 2023

- Configured and maintained PIN Entry devices via VERIFONE VHQ, ensuring PCI compliance.
- Conducted root-cause analysis using SQL, Wireshark, and log analysis to resolve system issues.
- Supported automated deployments and collaborated with QA teams on testing and certification.
- Executed knowledge transfer to the US and India teams, enabling workforce transition and delivering significant cost savings for the organization.

POS Systems Analyst - POS Systems Development, 2016 – 2022

- Supported point-of-sales (POS) and payments projects by offering technical expertise and working closely with developers and vendors on encryption and tokenization, NCR-CMA, NCR-AMS and POS rollouts, and PIN pad replacements.
- Created automated deployment and configuration process using C++, C#, Ruby, and scripting, ensuring successful project implementation.
- Configured, documented, and supported POS test environments, including store controllers, terminals, and payment gateways.
- Collaborated with QA for testing and troubleshooting using SQL, XML, Postman, and Wireshark.

Store Implementation and Support Analyst - Store Support Team, 2002 - 2016

- Managed, configured, supported, and documented Cisco routers, switches, and wireless networks, including routing, Inter-VLAN routing, Spanning Tree, ACL's, DHCP Snooping, Port Security, etc.
- Managed, configured, supported, and documented POS retail infrastructure, including POS controllers, servers, and payment devices.
- Led deployments of software and hardware upgrades, new store openings and closings, and technology rollouts.
- Developed an in-house automation tool for software update and configuration, and log collection.
- Recognized as an HBC Pinnacle Award finalist for exceptional service delivery and teamwork, for developing a recovery and backup process that enabled users to perform recoveries with minimal remote assistance, reducing downtime and lowering support costs by eliminating the need for on-site technicians.

CERTIFICATION/TRAINING

- AWS Certified Cloud Practitioner, Amazon Web Services (AWS) Training and Certification, 2023
- Certified in Cybersecurity, ISC2, 2023
- Certificate in Machine Learning, York University, 2021
